Dermazone SOLUTIONS

Product Fact Sheet: 1st Quarter 2006

Company Brief: Dermazone Solutions, established in 2001 and based in Clearwater, Fla., USA, is an evolution of Fountain Pharmaceuticals, a company with over 13 years and $16 million invested in pharmaceutical research, development and measurable therapeutic skincare results.

Executives:
Deborah Duffey, *President*
Linda Bernard, *Laboratory Director*
Carolyn Veroni, *Director of Business Development*
Dr. Christopher Brown, M.D., *Medical Director*

Product Overview: Dermazone Solutions formulates and markets the Celazome® line of clinical skincare therapeutic moisturizers and suncare products. Dermazone's advantage over comparable cosmeceutical lines lies in the company's patented Lyphazome® nanotechnology, the result of more than a decade of research and development. At 1/50th the size of a human skin cell—or 125 to 150 nanometers in radius—Lyphazome nanospheres penetrate deep within the epidermis to time-release bioactives, actives and moisture. The company's ***Skinperative***®-designated products feature multi-purpose properties benefiting virtually any skin type.
