**Treat yourself to fingers and toes worth touting with Celazome® Tip Treat™**

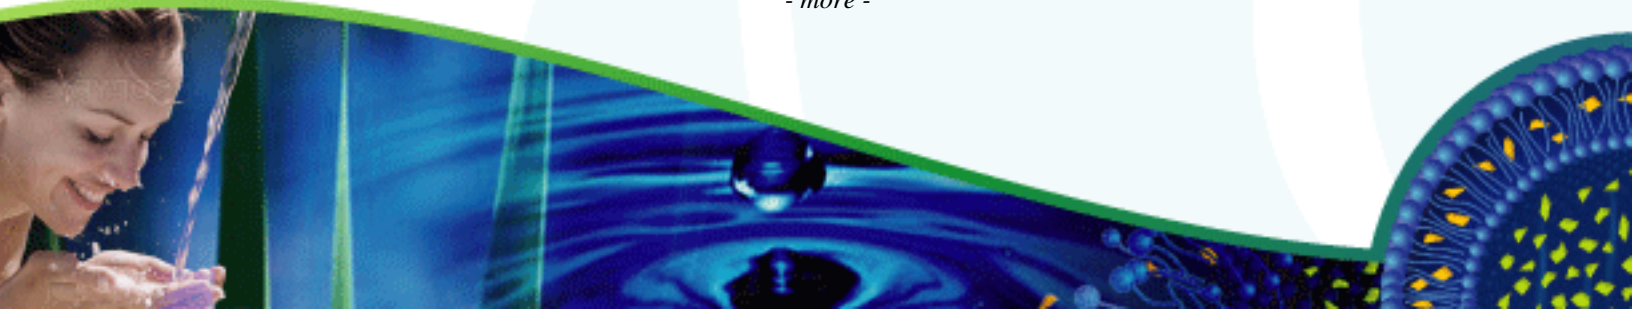

*Dermazone Solutions introduces "3-in-1" formula to exfoliate, moisturize and protect cuticles*

**Clearwater, FL, Tuesday September 27, 2005** – Dermazone Solutions announces today the launch of Celazome® Tip Treat™, the world's first cuticle exfoliator, moisturizer and protectant in one. Strong enough to remove tough-to-treat dead cuticle skin, yet gentle enough for daily use, Tip Treat revolutionizes the cuticle care industry by simplifying the process needed to achieve beautiful fingers and toes. This single, "3-in-1" product provides salon-quality results in just one application, eliminating time consuming, multi-product processes, or the time and expense of visiting a manicurist. Just one application strips away dry, dead cuticle skin, provides luxurious hydration with deep-penetrating Lyphazome® nanospheres, and shields frequently used fingers and toes from everyday damage. As a member of the company's new Treat Collection, Tip Treat comes with the Dermazone *Skinperative*™ designation, indicating it is a product with multi-purpose properties from which virtually any type of skin can benefit. Tip Treat is positioned to become a "must-have" for every user's daily beauty regimen.

Tip Treat's unique "3-in-1" formula exfoliates using Bromelain (Pineapple Extract), a potent protease enzyme and natural anti-inflammatory agent, which dissolves dead skin and speeds the development of healthy new cells. Next, Lecithin—a natural emollient and antioxidant derived from soybeans—acts as a soothing moisturizer, while the humectant Sodium Hyaluronate and hydrating Lyphazome nanospheres deliver water to thirsty skin. Finally, Dimethicone and Petrolatum form a protective barrier to prevent trans-epidermal water loss and ensure Tip Treat's effectiveness throughout daily activities such as hand washing.

Like all Dermazone products, patented Lyphazomes—the result of more than a decade of nanotechnology research for which Dermazone is recognized as the industry leader—deliver Tip Treat's bioactive ingredients when and where they are needed most for long-lasting results. At 1/50<sup>th</sup> the size of a human skin cell, these time-released nanospheres easily penetrate deep into the skin, beneath the stratum corneum, ensuring fast, effective care. Dermazone Solutions, the pioneer of nanosphere chemistry for use in cosmeceuticals, has incorporated Lyphazomes

- more -

into the company's product formulas since 1990. Tip Treat is formulated with no less than 80 percent Lyphazome nanospheres.

Celazome Tip Treat is part of Dermazone's new Treat Collection within the Celazome high-performance cosmeceutical skin care line. Celazome Treatments correct, improve, and resurface, and maximize the effectiveness of other Celazome products. The properties of Lyphazome delivery ensure each treatment provides gentle care and hydration while tackling some of the skin's most dramatic problems. In addition, Tip Treat comes with the Dermazone *Skinperative*<sup>™</sup> designation, indicating it is a product with multi-purpose properties from which virtually any type of skin can benefit.

Dermazone's Tip Treat and other items in the Celazome cosmeceutical skin care line can be purchased through select dermatologists, aestheticians, and spas, or through the company's website at [www.dermazone.com](http://www.dermazone.com).

#### **ABOUT DERMAZONE SOLUTIONS**

*Dermazone Solutions produces the Celazome® cosmeceutical skin care line and Lyphazome® therapeutic moisturizers and sunscreen preventions. Dermazone is an acknowledged leader in the use of cosmeceutical nanotechnology and has included patented Lyphazome® nanospheres as part of product formulas for over fourteen years. The company's Lyphazomes—the result of more than a decade of cutting-edge nanosphere chemistry research—provide Dermazone with an advantage over comparable cosmeceutical lines. These nanospheres are 1/50<sup>th</sup> the size of a human skin cell, guaranteeing superior delivery of the finest in bioactive and active ingredients. Each of the company's products currently employs more than 80 percent pure Lyphazomes. Dermazone products consist of a full suite of cleansers, toners, moisturizers, sunscreens, masques, and treatments including many Dermazone *Skinperatives*<sup>™</sup>, a designation given to Dermazone products that have multi-purpose properties from which virtually any type of skin can benefit. The products are used and recommended by aestheticians, dermatologists, burn centers, national sports teams, and celebrities worldwide. Dermazone Solutions' Celazome Skincare and Lyphazome moisturizers and sun care products can be purchased from Dermazone via the company's website ([www.dermazone.com](http://www.dermazone.com)).
