**Dermazone Solutions Canada Introduces Nanotechnology  
Skin Care Products to International Market**

*Calgary, Alberta-based company now provides Celazome, Kara Vita products to Canadians*

ST. PETERSBURG, Fla. (March 2010) – Dermazone Solutions Canada, based in Calgary, Alberta, has begun sales of Dermazone Solutions, Inc.’s popular Celazome and Kara Vita brands with the exclusive right to sell the skin care products in Canada.

Known for skin care products that use nanotechnology to deliver results into the skin rather than just on it, Dermazone Solutions, Inc. manufactures Celazome and Kara Vita cosmeceutical products for delivery to Dermazone Solutions Canada. All Celazome and Kara Vita products are available with the exception of sunscreens, which are awaiting approval for sale by Canadian regulators.

“We have had interest in Celazome and Kara Vita products from potential customers in Canada for a number of years,” said Deborah Duffey, President of Dermazone Solutions. “We are pleased we can now meet the demand for our skin care products with the help of Dermazone Solutions Canada.”

Celazome and Kara Vita products are available nationwide in Canada, though the company is initially focusing its outreach efforts in western Canada. Dermazone Solutions Canada has created an outside sales force to introduce the Celazome line to medical professionals, while the company is also creating a sales team for Kara Vita that holds at-home product demonstrations.

“We are seeing a high level of initial interest, which speaks to the quality of the Dermazone products,” said Bob McKenzie, Chief Executive Officer of Dermazone Solutions Canada. “We believe Celazome and Kara Vita products will be every bit as popular in Canada as they are in the States.”
