Dermazone Solutions Combines Powerful Ancient Herb and Nanosphere Technology to Launch Hyssop Health Therapy

All-natural product for wellness includes wild oregano oil to alleviate symptoms of illness

ST. PETERSBURG, FLA. (July 20, 2010) – Dermazone Solutions, a recognized leader in remedies for advanced health care management, has expanded with a new division and product line, Hyssop Health™, dedicated to improving wellness. Hyssop Health Therapy is a natural solution formulated to alleviate maladies, symptoms and disease-like conditions.

Two years in development, Hyssop Health harnesses the purification properties of a wild, mountain-grown oregano (*origanum vulgare*) found exclusively in the Mediterranean. Biblically known as hyssop, an ancient remedy, many recent studies by leading institutions have shown *origanum vulgare*'s ability to eliminate bacteria and viruses that cause acne, strep, influenza, and many other illnesses. In some studies, *origanum vulgare* outperformed traditional antibiotics and prescription anti-fungal solutions with its capacity to destroy the bacteria, fungi and viruses.

Origanum vulgare's effects can be attributed to 49 phytoelements affecting nine areas of the body. The phytoelements are antibacterial, antiviral, antifungal, anti-parasitic and anti-inflammatory, with proven effectiveness against MRSA, pseudomonas, staphylococcus, colds, influenza, athlete's foot, candida and internal parasites. Its antiseptic elements provide relief for bites, abrasions and sore throats. Its antioxidant and immunostimulant elements are important in helping the body prevent disease, and Cox-2 inhibitor elements have an anti-inflammatory effect for brain function.

The powerful phytoelements are encapsulated and enhanced by Dermazone's patented Lyphazome® nanosphere technology to create an all-natural homeopathic solution for improved wellness, overall health and quality of life. Retailing at \$40.00 for a 4-oz. bottle, Hyssop Health Therapy is available for purchase online at www.HyssopHealth.com.
